Note the special grooved heel, made to fit closely to the new patented harness. It has a straight sole, which gives it that rocking motion.

Double stitching reinforces the sole.

TRADE MARK

PALMER'S SKI BOOTS are scientifically constructed and appeal to professionals as well as amateurs, as they fit not only the foot but the ski harness. Boots of this type give one that feeling of "control" so essential in ski-ing.

Insist on PALMER'S "APPROVED NORWEGIANS" at your dealers.

THE NEW AID TO UP-HILL SKI-ING

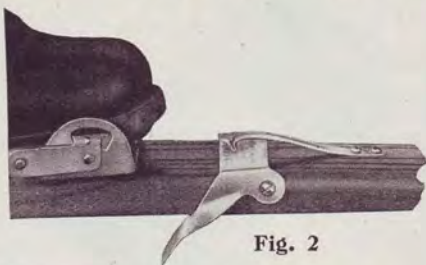

Fig. 2

Fig. 1

DEVELOPED to assist the skier in climbing, without interfering with free sliding on hills, or travel on the level.

WHEN NOT NEEDED they are held clear of the snow surface (the free-running position Fig. 1) by the spring latch.

WHEN NEEDED for climbing or negotiating slippery snow or ice on the level **RELEASE THE SPRING LATCH.** Climbers will then drop to the climbing position (Fig. 2) and are held there by the same spring.

Adjustable to any width of Ski.....\$2.00 per set
Non-Adjustable, standard width 2¾ in..... 1.50 " "
